

Positioning Landmarks

Multiple Choice

Identify the choice that best completes the statement or answers the question.

- ___ 1. The slight depression above each eyebrow is termed the:
- glabella.
 - supraorbital foramina.
 - supraorbital groove.
 - frontal tuberosity.
- ___ 2. Which of the following landmarks corresponds with the level of the petrous ridge?
- EAM
 - Top of ear attachment (TEA)
 - Squamosal suture
 - Inion
- ___ 3. Which term describes the small flap of cartilage covering the opening to the ear?
- Tragus
 - Pinna
 - Acanthion
 - EAM
- ___ 4. What is the difference, in degrees, between the infraorbitomeatal and orbitomeatal lines?
- 10°
 - 15° to 2°
 - 7° to 8°
 - 20° to 25°
- ___ 5. Which of the following is the positioning landmark located at the junction of the nose and the upper lip?
- Glabella
 - Acanthion
 - Foramen magnum
 - EAM
- ___ 6. What term is used to identify the angle of the mandible?
- Mental point
 - Glabella
 - Acanthion
 - Gonion
- ___ 7. What positioning landmark is located at the inner corner of the eye?
- Inner canthus
 - EAM
 - Nasion
 - Acanthion

- ___ 8. The depression on the anterior surface of the skull between the orbits is called the:
- a. acanthion.
 - b. inner canthus.
 - c. infraorbital margin.
 - d. nasion.
- ___ 9. There are several imaginary lines used to position the skull and facial bones. Which imaginary line connects the outer corner of the eye to the EAM?
- a. The infraorbitomeatal line
 - b. The orbitomeatal line
 - c. The acanthiomeatal line
 - d. The mentomeatal line
- ___ 10. The part of the frontal bone indicated in the figure below is the:

- a. bregma.
 - b. lambda.
 - c. glabella.
 - d. acanthion.
- ___ 11. The external landmark identified in the figure below is the:

- a. glabella.
- b. acanthion.
- c. outer canthus.
- d. infraorbital margin.

___ 12. The landmark identified in the figure below is the:

- a. nasion.
- b. glabella.
- c. acanthion.
- d. auricular point.

___ 13. The landmark identified in the figure below is termed the:

- a. nasion.
- b. glabella.
- c. acanthion.
- d. inner canthus.

___ 14. The topographic line shown in the figure below is the ___ line.

- a. glabellomeatal
- b. orbitomeatal
- c. acanthiomeatal
- d. infraorbitomeatal

___ 15. The topographic line identified in the figure below is the ___ line.

- a. orbitomeatal
- b. mentomeatal
- c. acanthiomeatal
- d. infraorbitomeatal
